YOU RUN A BUY-AND-BUILD FUND

Your next add-ons already exist. They're just below every banker's radar.

Stan, your AI Corporate Developer, reviews every company on the market of each of your platforms every night, keeps the add-ons that would genuinely strengthen it and writes down why he discarded the rest. You keep the one job that matters: deciding. No origination mandate, no extra analyst.

- **Your first 10 add-ons from a platform's website alone**
- **Free trial, no credit card**
- **A human Corporate Developer tunes Stan with you**

Fictional example, to show the format

YOUR WEEK

Build-up is in the plan. Sourcing is nobody's job.

The platform CEO is running the business, your deal team is on the next deal. So add-ons turn up when they turn up.

Monday, 8:30 am

The same teaser as everyone

An M&A boutique sends you a business for one of your platforms. Organised process, two rounds, the multiple pushed up. You know every other fund got the same PDF at the same time.

Tuesday, platform board

"We don't have time to look"

You chase the CEO on the build-up in the business plan. He has sites to run, two hires running late and a client renegotiating. He gives you two names, the same two as last quarter.

Thursday, 10 pm

A list, not a map

An analyst pulls an export from a database: hundreds of rows, industry codes, last year's revenue. Nobody knows which would actually fit the platform, or which have an owner ready to talk.

IC meeting

"How many add-ons this year?"

The IC wants a costed value creation plan, your LPs a build-up path. You have a thesis and three names. Not a pipeline.

A TYPICAL WEEK

From one platform's market to 1 to 3 decisions

ITS MARKET	STAN	US	YOU
~3,000	**~245**	**~15**	**1 to 3**
relevant companies, and new ones every day	screened every week, ~15 kept	analysed and checked, with a memo	decisions a week: YES or NO

Averages measured across our first 10 clients: Stan eliminates 94% of the work and covers an existing market in about 3 months.

WHAT IS AT STAKE

In buy-and-build, multiple arbitrage is won at entry. Rarely in an auction.

01

The best add-ons are bought off-market, before any mandate.

A founder planning retirement, a business with no investor yet, an owner looking for a home for the company. Whoever has known them for two years talks to them directly; whoever waits for the teaser pays the auction multiple.

02

The holding period starts running at the platform's closing.

Every quarter without an add-on pushes back the value creation plan, and the exit with it. The sorting has to be done before it reaches your desk.

03

A bad add-on hurts the platform, even bought cheap.

An add-on is judged by what it brings to the platform: clients, offer, geography, people, and how easily it integrates. Not by its multiple alone. That is the reasoning Stan applies to every company.

HOW PROPLACE ANSWERS

What Stan does for your platforms

On the left, what you need. In the middle, Stan's work. On the right, what you get.

WHAT YOU NEED →	WHAT STAN DOES →	WHAT YOU GET
Map the market of every platform	He derives the criteria from the platform's website, then queries 22 sourcing engines: registries, hiring, press, fundraises, new websites.	**A map of each platform's market that fills in every day: about 3,000 relevant companies on average.**
Only see real add-ons	He screens every company against the platform's thesis: MATCH or NO MATCH, with a written reason for every company he discards.	**1 to 3 decisions a week, each with its memo. Not a database export.**
Prove the synergies to your IC	He sets out the synergies with the platform, the integration risks and an LBO-calibrated model in a detailed investment memo.	**A reasoned case for your investment committee and your LPs.**
Get there before the auction	For every add-on you validate, he drafts the message to its founder and tracks the follow-ups.	**A founder conversation, led by you or the platform CEO.**
Get all the way to closing	He prepares the NDA and letter of intent, then a due diligence checklist and a 100-day integration plan.	**One thread all the way to integration into the platform, with your advisers.**

YOUR MODE: LBO, BUY-AND-BUILD

What Stan looks at for you

Stan is not looking for "good companies". He is looking for the ones that will be worth more inside your platform than on the day you buy them.

An LBO-calibrated model
The memo's model is calibrated for an LBO: leverage effect, 20–30% IRR, 2.5–4× MOIC.

Size and profitability
A revenue band and a margin profile that the platform and its debt can actually carry.

Fit with the platform
Same trade or adjacent offer, geography to cover, shared clients: what the add-on really brings.

Owner situation
Owned by its founder, no institutional investor yet: a conversation you can open directly.

Ease of integration
Systems, people, reliance on the owner: what it will take to integrate, in writing in the memo.

Valuation discipline
The add-on's estimated entry multiple against the platform's: the arbitrage has to work for you.

WHAT YOU GET

Decisions, not lists

The instant memo
For every add-on kept: what it does, why it matters to the platform, the verdict.

The detailed investment memo
Synergies with the platform, LBO-calibrated model, risks and questions for the founder.

The Monday review
Your pending decisions, Stan's decisions, and market news: acquisitions, fundraises, competitors.

The outreach message
Written for the add-on's founder, with follow-ups tracked.

NDA and letter of intent
Prepared from the file, for your lawyers to approve.

The 100-day plan
Actions, owners, deadlines, then LP reporting tracked against the plan.

THE ALTERNATIVES

Yes · Partly · No

What you do today, and what it costs you

WHAT MATTERS	Proplace	M&A intermediaries	Databases	Operating partners
Covers the whole market	✓ Every night, 22 engines	◐ The deals they have on mandate	◐ What is already listed	✗ What the team has time to see
Reasons from the platform	✓ The platform thesis drives screening	✗ A teaser written for every fund	✗ Filters, not a thesis	◐ Yes, when they have the time
Says why a company is discarded	✓ A written reason for each one	✗ Never	✗ Never	✗ Rarely in writing
Gets you in before the auction	✓ Direct approach to the founder	✗ Companies already for sale	◐ If you make the call yourself	◐ If the calendar allows
Cost	✓ Free trial, then an annual plan	✗ The auction multiple	◐ Annual licence per seat	✗ Salaries and partners' time

ⓘ Proplace does not replace your advisers for negotiation, due diligence and financing: lawyers, auditors, lenders and intermediaries stay in the loop, with files ready to go.
