AI CORPORATE DEVELOPER

We find the companies you should track, fund or acquire.

Stan is your **AI Corporate Developer**. Every night, he reviews every company on your market, keeps the ones that would create the most synergies with you, and discards the others — writing down why. You get **5 to 10 decisions a month**, each one backed by a detailed investment memo.

Acquisition · Minority stake · Simple watch

- **Stan derives your criteria and hands you your first ten targets.**
- **Free trial, no credit card**
- **A human Corporate Developer tunes Stan with you**

EVERY MONDAY

You receive your deal flow review, which includes:

- all your YES or NO decisions still pending;
- every file studied by Stan and all of his decisions;
- all your Corporate Developer's annotations that improve Stan;
- all your decisions and annotations that improve Stan;
- all the news of your market and your competitors — fundraises, acquisitions, news.

And your decision fits in two buttons.

YES goes to "Validated": start due diligence

NO goes to discarded

MEASURED ACROSS OUR FIRST 10 CLIENTS

94% of the work eliminated before it reaches your desk

~3,000 relevant companies per market

1 to 3 decisions a week, each with a memo

22 sourcing engines

THE SORTING

Stan detects, analyses and sorts. We verify.

YOUR MARKET	STAN	US	YOU
~3,000	**~245**	**those 15**	**~1 to 3**
relevant companies, and new ones every day	screened every week, ~15 kept	analysed and decided on, with a memo	to decide on every week, with a detailed memo

Stan eliminates **94% of the work** before it reaches your desk. That is not a promise: it is our MATCH rate measured across our first 10 clients — 6% of screened companies are kept, and you get a verdict and a memo for each of them. Coverage: **~3 months** to catch up on what exists — after that, the watch never stops.

WHO IS STAN

Stan works. We check. You decide.

Stan is our AI. Behind him, a team that has deployed capital in seed, venture, growth, LBO and M&A.

Where our team has deployed capital

Partech · Ardian · Google · Mirakl · leboncoin

That judgment, applied to your market, every single night.

Nobody on your team can cover your entire market — not for lack of skill, but for lack of bandwidth.

Thesis-led deal flow, before the round

→ The page | The PDF

Venture & Growth VC
Series A to C, competitive rounds

→ The page | The PDF

Single or multi-family office
Direct investments, patient capital

→ The page | The PDF

THE M&A VALUE CHAIN, FROM STRATEGY TO SIGNING

One engine to source, screen, approach and audit

1	**Thesis & radars** Understand the acquirer, then aim to find 100% of potential targets.	We analyse **your** company to write your **acquisition or investment strategy**. It drives **22 sourcing engines**, plus your tools connected by **API**: no target slips through.
2	**AI sourcing & verdict** Filter the noise, analyse, decide.	Every night, Stan screens thousands of companies against your thesis: **MATCH** or **NO MATCH**, with a justified **instant memo**. You judge, **Stan learns** your biases.
3	**Deal flow** Approach validated targets and keep the pipeline moving.	Every analysed file lands at the right stage of your funnel with its **memo**. For a validated target, Stan **drafts the outreach** to the CEO and **tracks follow-ups**.
4	**Due diligence & closing** Prepare DD, agreements and closing.	Stan drafts the **NDA, LOI or term sheet** from the file, tailored to your profile: corporate, VC, growth or LBO. A **checklist** guides your due diligence to **closing**; every decision keeps its evidence, and you and your advisers approve.
5	**Integration & follow-up (PMI)** Deliver the first 100 days and monitor the investment.	Stan turns the deal's commitments into a **100-day plan**: actions, owners, deadlines. Your **reporting** (board, LPs) is added to the memo to track gaps against the original strategy.

✦ **All the intelligence behind your external growth runs on a single engine that learns from your decisions.**
