YOU ARE A VENTURE & GROWTH VC PARTNER

The round will be decided in days. Your conviction is built months earlier.

Stan, your AI Corporate Developer, reviews every company on your market every night, keeps the ones that fit your thesis and writes down why he discarded the rest. He tracks those not raising yet and alerts you when they hit a milestone. You keep the one job that matters: deciding. Without tying up your associates on screening.

- **Your first 10 companies from nothing but your fund's website**
- **Free trial, no credit card**
- **A human Corporate Developer tunes Stan to your thesis**

Fictional example, to show the format

YOUR WEEK

Too often, you hear about a round once it's full.

Your CRM holds hundreds of companies. Nobody updates it, and your associates spend their evenings in data rooms.

Monday, 8:40 am

A rival fund's pre-empt

Another fund announces on LinkedIn that it is leading the Series B of a company you were tracking. Pre-emptive, closed in nine days. Your last note on it is fourteen months old.

Wednesday, 10 pm

The memo for Thursday's IC

Your associate has been in the data room since Monday. The memo for Thursday's committee isn't ready, and at midnight you are reworking the NRR assumptions yourself.

Thursday, between pitches

A market map gone stale

Your market map for the "data infrastructure" thesis dates from the spring. Since then, three companies have raised, two have pivoted, and a dozen new ones have appeared that nobody has looked at.

Investment committee

"Why this one and not another?"

Your partners ask why this company and not its three competitors. You have a conviction and a spreadsheet. Not a market map.

A TYPICAL WEEK

From your whole market to 1 to 3 decisions

YOUR MARKET	STAN	US	YOU
~3,000	~245	~15	1 to 3
companies in your theses, and new ones every day	screened every week, ~15 kept	analysed and checked, with a memo	decisions a week: YES or NO, which calibrate Stan

Averages measured across our first 10 clients: Stan eliminates 94% of the work before it reaches your desk.

WHAT IS AT STAKE

You rarely lose a round on valuation. You lose it by showing up late.

01

The best rounds are decided before they are announced.

When a founder prepares a Series B, they first call the investors who have followed them since the Series A. Whoever knows the numbers leads or pre-empts; whoever waits for the deck lands in a process, against every other fund.

02

Your bandwidth is the scarcest resource in the fund.

Every hour spent sorting lists is taken from founders, the committee and your portfolio. The sorting has to be done before it reaches your desk.

03

The buzz around a round is not a thesis.

An investment is judged by what it brings to your fund: category, quality of growth, capital efficiency. Not by how many funds are looking at it. That is the reasoning Stan applies to every company.

HOW PROPLACE ANSWERS

What Stan does for you, every night

On the left, what you need. In the middle, Stan's work. On the right, what you get.

WHAT YOU NEED →	WHAT STAN DOES →	WHAT YOU GET
Know your whole market, thesis by thesis	He derives your thesis from your fund's website, then queries 22 sourcing engines: fundraising trackers, job posts, press, VC portfolios, Crunchbase.	**A market map per thesis that fills in every day: about 3,000 relevant companies on average.**
Only look at what matters	He screens every company against your thesis: MATCH or NO MATCH, with a written reason for every company he discards.	**1 to 3 decisions a week, each with its memo. Not a CRM export.**
Build conviction before the IC	He covers market, competitive position, traction signals and risks in a detailed investment memo.	**A reasoned case for your committee, before the data room even opens.**
Be there before the round	He tracks your companies between rounds, alerts you at each milestone and drafts the message to the founder.	**A conversation with the founder before the deck goes round.**
Get all the way to closing	He prepares the term sheet from the file, then the due diligence checklist each YES unlocks.	**One thread all the way to signing, with your lawyers and your committee.**

YOUR MODE: VENTURE & GROWTH VC

What Stan looks at for you

Stan is not looking for "companies that are raising". He is looking for the ones whose next round you should lead.

Measurable ARR
Recurring revenue already real: the memo estimates it from public signals, or names what is missing.

NRR above 130%
Customers who spend more every year: the threshold Stan calibrates his financial model on.

Burn multiple below 1.5×
Efficient growth: less than €1.50 burned for every €1 of net new ARR.

Growth signals
Hiring in its job posts, new markets, launches: a team that is visibly scaling.

Category position
Leader, challenger or follower: against whom, and what makes it hard to catch.

Round timing
The last round picked up by fundraising trackers, its size and the time elapsed since.

WHAT YOU GET

Decisions, not lists

The instant memo
For every company kept: what it does, why it fits your thesis, the verdict.

The detailed investment memo
Market, competition, traction signals, risks and the questions to ask the founder.

The Monday review
The week's calibration, your pending decisions, Stan's decisions, and the rounds, acquisitions and news of your market.

The between-rounds alert
Stan tells you when a company you track hits a milestone.

The founder outreach
For every company you validate, with follow-ups tracked.

The term sheet
Prepared from the file, then a due diligence checklist all the way to closing.

THE ALTERNATIVES

Yes · Partly · No

What you do today, and what it costs you

WHAT MATTERS	Proplace	Databases	Placement agents	Your team and the CRM
Covers your whole market	✓ Every night, 22 engines	◐ What is already listed	◐ The deals they are placing	✗ What the team has time to see
Reasons from your thesis	✓ Your thesis drives the screening	✗ Filters, not a thesis	✗ The deal they have to place	◐ Yes, when the team has time
Says why a company is discarded	✓ A written reason for each one	✗ Never	✗ Never	✗ Rarely in writing
Gets you in before the round	✓ Milestone alert, founder outreach	◐ If you set up the alerts	✗ Rounds already organised	◐ If someone follows up in time
Cost	✓ Free trial, then an annual plan	◐ Annual licence per seat	◐ Free, but the same deck for everyone	✗ Your team's evenings

ⓘ Proplace complements your databases, which can connect to it by API, and does not replace your lawyers: due diligence and closing stay in your hands, with files ready to go.
