YOU RUN A GROUP OR ITS M&A TEAM

Your market is consolidating. Your long list dates from the last ExCom.

Stan, your AI Corporate Developer, reviews every company in your market every night, keeps the ones that would create the most synergies with your group and writes down why he discards the rest. Your M&A team keeps the work that matters: winning over the committee, negotiating, integrating.

- **Your first 10 targets from nothing but your group's website**
- **Free trial, no credit card**
- **A human Corporate Developer tunes Stan with your team**

Fictional example, to show the format

YOUR WEEK

Hundreds of targets, a long list that can't keep up.

Your M&A team is built to execute deals, not to watch a whole market every week. So monitoring always comes second.

Monday, 8:30 am

Another target in an auction

A bank sends you the teaser for a company you have followed for years. Organised process, four funds and two trade buyers at the table. You knew the company; you had never called its owner.

Wednesday, between calls

The business unit's target

A BU head sends you a name spotted at a trade show and wants your view by Friday. Your analyst is already tied up on two due diligences. The name joins the "to look at" tab.

Thursday, 6:40 pm

A rival's press release

Your main competitor announces another acquisition in your region. The target was on your long list, somewhere around row 200. Nobody had looked at it in two years.

ExCom meeting

"Where is the M&A pipeline?"

You are asked which deals will close this year. Your best target's business case is eighteen months old. Nobody has reopened it.

A TYPICAL WEEK

From your whole market to 1 to 3 decisions

YOUR MARKET	STAN	US	YOU
~3,000	~245	~15	1 to 3
relevant companies, and new ones every day	screened every week, ~15 kept	analysed and checked, with a memo	decisions a week: YES or NO, which calibrate Stan

Averages measured across our first 10 clients: Stan eliminates 94% of the work and covers the existing market in ~3 months.

WHAT IS AT STAKE

To consolidate a market, you have to see all of it, before anyone else.

01

Every good target has one acquirer: whoever gets there first.

A company bought by a competitor leaves the market for years. Whoever has known the owner for a long time talks to them directly; whoever waits for the teaser ends up in an auction, against funds and other trade buyers.

02

Your teams can only integrate a few companies a year.

So each one has to be the best available, not the first that comes along. The screening has to cover the whole market before it takes up your M&A team's time.

03

A vague synergy ends up in the seller's pocket.

In an auction, the price gets justified by synergies written once and never revisited. Stan quantifies them target by target, year by year, and works out the price above which the deal stops creating value.

HOW PROPLACE ANSWERS

What Stan does for your team, every night

On the left, what you need. In the middle, Stan's work. On the right, what you get.

WHAT YOU NEED →	WHAT STAN DOES →	WHAT YOU GET
A long list that covers the whole market	He derives your acquisition strategy from your website, then queries 22 sourcing engines: registries, hiring, press, fundraises, new websites.	**A map of your market that fills in every day: about 3,000 relevant companies on average.**
Free up your analysts	He screens every company against your strategy: MATCH or NO MATCH, with a written reason. A name from a BU? He judges it on demand.	**1 to 3 decisions a week, each with a memo. Your team stays on deals.**
Quantify synergies before the committee	He quantifies synergies across at least 8 types (revenue, cost, structural, defensive), years 1 to 5, discounted at WACC.	**A business case for the committee, with the maximum price to pay.**
Approach outside any process	For every target you validate, he drafts the message to its owner and tracks the follow-ups.	**A direct line to the owner, before any sale mandate.**
Get all the way to PMI	He prepares the NDA and letter of intent, then a due diligence checklist and a 100-day plan.	**One thread all the way to integration, with your advisers and operating teams.**

YOUR MODE: STRATEGIC ACQUIRER

What Stan looks at for you

Stan is not looking for "good companies". He is looking for the ones that would be worth more inside your group than with a competitor.

Quantified synergies
Revenue, cost, structural, defensive: at least 8 types, cascaded over 5 years and discounted at WACC.

White spaces
The regions and segments where your group is absent, and the companies already established there.

Integration complexity
Systems, cultures, reliance on the owner: what your integration teams will have to absorb.

Defensive value
What you would lose if a competitor bought the target before you: clients, teams, position.

Consolidation map
Who is buying in your market, and what each deal changes.

Price discipline
The maximum price to pay, synergies and integration costs included, so you never overbid.

General information, not investment advice.

WHAT YOU GET

Decisions, not Excel rows

The instant memo
For every company kept: what it does, why it matters to your group, the verdict.

The detailed investment memo
Quantified synergies, maximum price, integration risks and the questions to ask the owner.

The Monday review
The week's calibration, your pending decisions, Stan's decisions, and your competitors' acquisitions and fundraises.

The outreach message
Written for the owner, off-market, with follow-ups tracked.

NDA and letter of intent
Prepared from the file, then the due diligence checklist.

The 100-day plan
The deal's commitments turned into actions, owners and deadlines for your PMI.

THE ALTERNATIVES

Yes · Partly · No

What you use today, and what is missing

WHAT MATTERS	Proplace	Banks and M&A boutiques	Databases	In-house analysts
Covers your whole market	✓ Every night, 22 engines	◐ Their own address book	◐ What is already listed	◐ What they have time to track
Quantifies the synergies	✓ Over 5 years, discounted at WACC	◐ Depends on the mandate	✗ Data, not synergies	◐ For priority targets
Says why a company is discarded	✓ A written reason for each one	✗ Never	✗ Never	◐ For a few of them
Gets you in before the auction	✓ Direct approach to the owner	◐ Mostly companies in a process	◐ If your team makes the call	◐ When time allows
Cost	✓ Free trial, then an annual plan	✗ Retainer plus success fee	◐ Annual licence per seat	✗ Full-time salaries

ⓘ Proplace does not replace your banks or advisers for negotiation, due diligence and closing: they stay in the loop, with files ready to go.

Three ways to start today

The Proplace sheet (PDF) · This page, online

Scan to launch your deal flow

1 Your first 10 targets
Enter your group's website: Stan derives your strategy and returns your first ten targets, kept or discarded, each with its reason.

Get my targets →

2 Your consolidation strategy, written by Stan
Before the first target, Stan shows you the consolidation strategy he understood from your website. You correct it in one sentence; it then drives all the screening.

See my strategy →

3 Your current long list, screened by Stan
In 30 minutes, a Corporate Developer runs the first names on your long list through Stan with you. In the trial, paste targets one by one; on Enterprise, the whole list at once.
